SUMMER SAFETY SURVIVAL GUIDE 10 TIPS TO KEEP YOUR FAMILY SAFE

Summer is the time for outdoor cookouts, pool parties and backyard play dates – not a time for bandaging scrapes, nursing burns – or worse. Learn these important summer safety tips and make sure everyone in your family knows them by heart too. That way, it will be a summer to remember, for all the right reasons.

Pool Safety:

Supervise constantly:

Good supervision means you are able to scan the pool area every 20 seconds and be able to reach the pool in 10 seconds.

Put multiple safety barriers between children and the pool.

Install a four-foot fence with a self-closing, self-latching gate that has a locking mechanism beyond a child's reach. Also cut overhanging tree limbs and remove chairs or ladders from the pool area to prevent children from climbing over the fence surrounding the pool.

Always check the pool first if a child is missing:

Child drowning is often a silent death that alerts no one with splashes or yells for help. Many drowning accidents happen when children have been missing for less than five minutes.

Empty small wading pools and remove all toys after children are through playing:

Infants can drown in just a few inches of water. Floats, balls and other toys may attract children to the pool when it is unattended.

Backyard Safety:

Keep grills at least 10 feet away from any structure:

Grilling mishaps cause more than 8,300 fires and send 3,000 people to the emergency room each year. Never grill indoors or near garages or porches, even if it's raining.

Have a spray bottle or fire extinguisher handy:

An unexpected flare up can burn more than your burgers. Use a spray bottle to avoid flare ups and have a fire extinguisher nearby. Also, coals get hot – in some cases up to 1,000 degrees Fahrenheit – so dispose of charcoal away from kids and pets and cool it down with a hose.

Never use gasoline or kerosene to light a charcoal fire:

Both can cause an explosion. When grilling, use insulated, flame-retardant mitts and long-handled barbecue tongs and utensils to handle food and coals.

Check gas grill hoses for cracking, brittleness, holes and leaks:

If the tank valve or grill needs repair, do not attempt to do it yourself. Take it to your local home improvement store or qualified appliance repair person.

Inspect outdoor decorative lights carefully:

Some families add back yard ambience with outdoor decorative lighting. Do not connect more than three midget light string sets together. Light strings with screw-in bulbs should have a maximum of 50 bulbs connected together. Be sure to use light strings bearing the UL Mark.
