## Home Fire Safety Checklist

### Heating

- Baseboard heaters do not touch any furniture or curtains, or other items stored on the floor.
- Have chimneys and heating systems inspected, cleaned and repaired prior to the heating season.
- All portable heaters are placed at least three feet from bedding, furniture, and other flammable materials. They are plugged directly into the outlet, not into an extension cord.
- Portable heaters are turned off when you leave the room or before going to bed.
- Every fireplace is equipped with a sturdy metal screen.

### Electrical

- Use as few extension cords and plug adapters as possible.
- Extension cords used are not tacked to walls, run under rugs, or through doorways.
- Small appliances, like the toaster, are unplugged when not in use.

### Housekeeping

- Matches and lighters are kept out of the reach of children in a secure place.
- Paint, varnish, and other flammables are stored in sturdy metal containers in a cool place.
- Ashes from fireplaces and barbecues are only disposed of in metal containers.
- Candles are only lit when someone is able to keep an eye on them and when placed in sturdy holders away from things that can burn.

### Kitchen

- In the event of a grease fire, know that the best thing to do is to put a lid on it.
- Cooking is never left unattended.
- The oven is never used to heat the home.

### Smoking

- Do not smoke in bed or while lying down.

### Smoke Alarms

- Smoke alarms are installed on a ceiling or high on the wall in each bedroom and on each level of the home.
- Smoke alarm batteries are changed once a year or as recommended by the manufacturer.
- Smoke alarms are tested and vacuumed regularly.

### Escape Plan

- Have a plan of escape showing two ways out of every room in your home, especially bedrooms.
- Regularly practice your escape plan by holding fire drills in your home.
- Windows used for escaping can be opened easily.
- House numbers are clearly visible from the street.

## SMOKE ALARMS SAVE LIVES

### Count your smoke alarms

Chelan Fire & Rescue recommends you install at least one smoke alarm on every level of your home, including one in every bedroom.

### Check your smoke alarms

Press the test button on smoke alarms each month to make certain they are still working.

### Vacuum your smoke alarms

Clean smoke alarms each month of dust and cobwebs to keep them working properly.

### Change your batteries

Change smoke alarm batteries at least once a year, or as soon as the alarm “chirps” warning that the battery is low. A way to remember is when clocks are changed from daylight saving time.

### Change your alarm

Replace smoke alarm units at least every ten years.

### Know the sound

Make sure everyone in the home can hear and recognize the sound of the smoke alarm and knows how to react immediately. Assistive devices are available for those who are deaf or hard of hearing.

## FIRE DRILL CHECKLIST

- The escape plan has been discussed with all family members.
- Start the drill with everyone in their room, pretending to be asleep.
- Signal the start of the drill by sounding the smoke alarm. It is especially important for children to recognize the sound of the smoke alarm.
- Practice using your main escape routes first. Do not run. Just go quickly and calmly outside and to the meeting place.
- The family meeting place should be located safely away from the building and out of the way of the arriving fire department.
- Everyone should arrive at the family meeting place in under two minutes.
- Someone pretends to go call 911 for help from a neighbor’s house. They know to answer all of the 911 dispatcher’s questions and to not hang up until told to do so.

## HOME FIRE ESCAPE PLAN

### *Have a Plan*

Make a plan for every room and every member of your home. Mark two ways out of each room including windows.

### *Security Bars*

Ensure security bars on windows have quick-release devices. Bars need to be opened easily and quickly from the inside by everyone in the household. Make sure to practice opening them.

### *Have a Meeting Place*

Pick a meeting place outside, well away from the building. Do a head count at the meeting place to make sure everyone got out.

### *Call 911*

Call 911 as soon as you are outside safely.

### *Stay Out*

Once you are outside, stay outside.

### *Tips for a safe escape*

If you see smoke, try another way out. If you cannot avoid the smoke, crawl under it on your hands and knees.

Do not stop or go back for anything.

Possessions can be replaced, your life cannot.

Remember fire spreads very fast. Get out immediately and stay out. Call 911 as quickly as possible.

## FIRE EXTINGUISHERS

A properly operated fire extinguisher can stop a small fire and keep it from growing. An ABC, multipurpose dry chemical extinguisher is the recommended type.

*Before using a fire extinguisher be sure you:*

- Know how to use the extinguisher
- Know how to tell if the fire is safe to fight
- Call 911
- Alert others to evacuate and you can quickly exit if needed
